

# MANUAL STAINING SET

Staining reservoirs for reagents,  
volume 250 ml

The new Diapath manual staining set has been designed to help laboratory technicians in routine cytological and histological staining procedures and to meet the need of reagent consumption optimization.

Pic. 1

Pic. 2

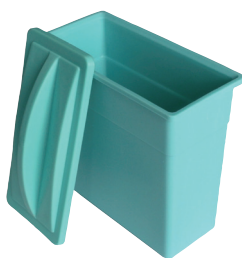

## **Code: SDSCM0000**

- Material: **Stainless steel (AISI 304)**
- Steel surface finishing: **Scotch bright**
- Dimensions (WxDxH): **726x171.5x125 mm**
- Weight (with reservoirs): **4.2 Kg**
- **Lid holder** (Pic. 1)
- 3 available **timer** models (optional)
- **Timer support** (optional) (Pic. 2)

## **RESERVOIRS DESIGNED FOR REAGENT SAVING**

The 12 reservoirs, volume 250 ml, and the handy lids with snap closure, assure an appropriate reagent use avoiding their evaporation and reducing their consumption. Both reservoirs and lids are made in ABS, a plastic material resistant to the most common solvents used in Anatomic Pathology (as xylol, isoparaffins, limonene). It is possible to clean them in dishwasher.

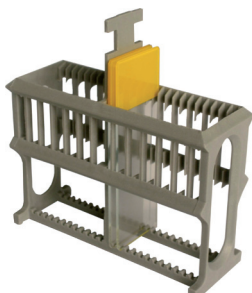

## **Code: SDSCM0002**

- Material: **ABS**
- Dimensions (WxDxH): **107x51x100 mm**
- Volume: **250 ml**

## **NEW RACK FOR 24 SLIDES**

The new rack for slides, made in ABS and equipped with a shaped handle, for 24 slides, has been studied to permit its total immersion into the reservoirs. The reservoirs are tight-fitting and they can be closed with the snap-locking cover, avoiding any reagent evaporation.

## **Code: SDSCM0006**

- Material: **ABS**
- Dimensions (WxDxH): **90x32x95 mm**
- Capacity: **24 slides**

# MANUAL STAINING SET

Staining reservoirs for reagents, volume 450 ml

## SET WITH 12 STAINING RESERVOIRS

Structure entirely made in stainless steel sheet, resistant to corrosion of the main solvents used in Anatomic Pathology (as xylol, isoparaffins, limonene), complete with rubber feet for a better stability.

### Code: 061010/CM

- Material: **Stainless steel (AISI 304)**
- Steel surface finishing: **Scotch bright**
- Dimensions (WxDxH): **680x180x160 mm**
- Weight (with reservoirs): **7.5 Kg**
- **Lid holder**
- 3 available **timer** models (optional)
- **Timer support** (optional) (Pic. 2)

## SET WITH 3 STAINING RESERVOIRS

Model with 3 staining reservoirs, volume 450 ml. Stainless steel structure complete with rubber feet for a better stability.

### Code: 061011/CM

- Material: **Stainless steel (AISI 304)**
- Steel surface finishing: **Scotch bright**
- Dimensions (WxDxH): **200x180x160 mm**
- Weight (with reservoirs): **2.5 Kg**
- **Lid holder**
- 3 available **timer** models (optional)
- **Timer support** (optional) (Pic. 2)

## STAINING RESERVOIR FOR REAGENTS, VOLUME 450 ML

Both the manual stainers mentioned above, use reservoirs with volume of 450 ml, made in printed PET, resistant to the most common solvents used in Anatomic Pathology labs (as xylol, isoparaffins, limonene).

### Code: 53STX02

- Material: **PET**
- Dimensions (WxDxH): **125x35x130 mm**
- Volume: **450 ml**

## RACK FOR SLIDES

Plastic rack with removable chrome plated iron handle, able to contain up to 30 slides; available with both manual stainers mentioned above.

### Code: 53CV30

- Material: **Plastic**
- Handle material: **Chrome plated iron**
- Dimensions (WxDxH): **106x31x105 mm**
- Capacity: **30 slides**
